# Introducing

dash's neighborhood

Step into Dash's Neighborhood, where Dash inspires on the screen. With their own online Dash, students develop coding literacy at their own pace. Designed for creating programs in class and practicing skills at home, Dash's Neighborhood is the perfect companion to hands-on robotics learning that students love.
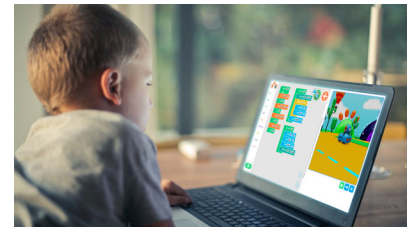

A robot for every learner.

Make your coding and robotics classroom one-to-one with Dash's Neighborhood. Just open Blockly to start coding Dash online.

Easily help students along their path to coding literacy. Find solutions, extensions, and more Dash's Neighborhood resources in Class Connect.

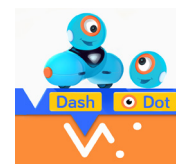

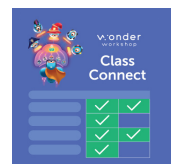

Integrating home learning has never been easier, or more fun! Students can continue projects where they left off, wherever they are.

"Not only do we love Dash but, having access to Dash's Neighborhood, especially during this time of distance learning, has been a wonderful addition to our computer science curriculum. My students are fully engaged and extremely motivated by having their own personal Dash to program. I have been able to teach coding with my students in this distance learning platform in a very meaningful and progressive way."

MICHELLE MITCHELL
3rd grade, STEAM Teacher, LAUSD, CA

Dash's Neighborhood is available at no additional cost with a Wonder Workshop Class Connect license. Class Connect is free to all educators through June 2020. Users with Class Connect can access Dash's Neighborhood from within the Blockly app on a Chrome browser or on Chromebooks. iPad support will be available for return to school in fall 2020.

Wonder Workshop is committed to student privacy and security. Learn about our privacy policy, compliance, & more at makewonder.com/trust-safety
